

Counselling on addiction

Do you have any questions regarding addiction or substance abuse? Do you have problems with drugs, alcohol, medicines? Are you looking for advice because someone in your environment has drug problems?

WHO are we addressing?

Our services are aimed at people

- who have developed a dependence on a drug, whether legal or illegal or
- who are at risk of developing a dependence and
- at people from their social environment (relatives, employers, doctors in private practice) as well as various institutions (schools, hospitals, etc.)

At the Addiction Counselling Centre in Mistelbach, additional support is offered to people with behavioural addiction (gambling, internet, shopping addiction, etc.).

WHAT do we offer?

- counselling by social workers and on medical issues
- medium- and long-term support
- psychotherapy

All our services can be used free of charge and, on request, also anonymously.

If you need a translation of your counselling and you have no-one to assist you, we can offer you a video interpreter following prior appointment by telephone.

WHO are we?

At our locations you will find social workers, medical practitioners and psychotherapists, all of them experts in the field of addictions. Wherever necessary, we cooperate closely with other institutions.
